x2 PARALLEL CAPABILITY

Equipped with the inverter technology, this generator delivers a perfect quality of current, voltage and a very stable frequency which make it possible to use even with the most sensitive devices (computers, electronic equipments…). Equipped with the automatic idling system, the engine speed can be automatically adjusted to the required power which reduces consumption and noise. Transportable and soundproofed, this unit is ideal for all types of users and applications, professional, on site and leisure activities. With its coupling function, you can connect in parallel two ACCESS 3500 i and double the available power. It gives you a more powerful generator avoiding the question of additional weight and dimension increase.
